Turn on the watch

To turn the phone on or off, press and hold the On/Off button on the side of the
Smartwatch

Long press the On / Off key

Insert a SIM Card

The Smartwatch allows you to store phone contact information on your Smartwatch itself or on a removable SIM card. To insert a SIM card into the Smartwatch, do the following:

1. Switch off the Smartwatch by pressing and holding the power button until the screen goes dark.

push
the clip
remove
battery

Put it in the bottom first

2. Turn the Smartwatch over and remove the back plate by lifting the handle up.
3. Open the top one of the two silver metal guards by gently lifting up on the left side.
4. Insert the SIM card into the slot.
5. Flip down the silver metal cover.
6. Replace the back plate. Put in the bottom part first and once the battery is in its place put down the handle to lock.

Important :
1. Smartwatch Operating Frequency is **GSM 2G 850/900/1800/1900**
2. If your card is PIN-locked your phone will display "card is locked". You must enter PIN before the phone can start working.Please contact your network service provider if you need

Insert a Micro SD Card

The Smartwatch allows you to store music, videos, audio recordings, and other data on a removable micro SD card. To insert a micro SD card into the Smartwatch, do the following:
1. Switch off the Smartwatch by pressing and holding the power button until the screen goes dark.
2. Turn the Smartwatch over and remove the back plate by lifting the handle up.
3. Open the top one of the two silver metal guards by gently lifting up on the left side.
4. Open the lower one of the two silver metal guards by gently lifting it up from the top.
5. Insert the micro SD card into the slot.

6. Flip down both the silver metal covers.
7. Replace the back plate. Put in the bottom part first and once the battery is in its place put down the handle to lock

Reminder: Micro SD card is not included. Micro SD card is recommended   to enjoy all the functions in the Smartwatch.
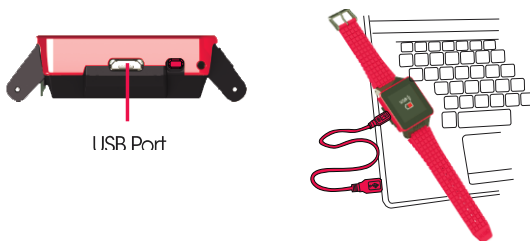

Charge the Battery

The Smartwatch digital display screen tells you how of a charge is left in the battery.

🔋 0% remaining

🔋 50% remaining

🔋 100% (Fully charged)

To charge the Smartwatch battery, do the following:

1. Take the USB cable that came with the Smartwatch.

USB Port

2. Insert the smaller end of the cable in the USB port on the left side of the Smartwatch.

3. Insert the larger end of the cable into a USB port on your computer, or another USB charger.

   Connect data cable and charger, plug one end into your phone's USB port.
   Plug the other end of the charger into the appropriate electrical outlet (100~240VAC).

For first time use, charge the battery for at least 5 hours before use. When your smartwatch indicates that the battery is fully charged, remove the charger.

Go to Your Inbox
To view your SMS message inbox, do the following:

1. Tap the Messages menu.
2. Tap the Inbox option in the menu.

View and Manage Sent Messages
To view and manage your sent messages, do the following:

1. Tap the Messages menu.

2. Tap the Sent messages option in the menu
3. Tap any message to access it.
4. Tap the Options menu to access
   View
   Reply
   Call sender
   Forward
   Delete
   Delete all

View Draft Messages
To view your draft messages, do the following:

1. Tap the Messages menu.
2. Tap the Drafts option in the menu

Change the Input Method Locally

Note: The following instructions explain how to change the input method for a specific SMS message as you are creating it. To change the default input method of the system, refer to the Settings section of this guide.

Changing the Input Method of an SMS message allows you to specify the language
you want to create the message in, add numbers and symbols to the message, or
write in all lowercase or all uppercase letters. To change the input method locally,
do the following:

1. Tap the Messages menu.
2. Tap the Write message option in the menu.
3. Select Text message
4. Tap the Options button
5. Tap 'change input method' and tap the input method you want to use.

View & Edit Profile Settings
To view and configure your profile settings, do the following:

1. Tap the Messages menu.
2. Tap 'Message Settings' in the menu.
3. Select 'Text message'
4. Select 'SIM message settings'

5. Select 'Profile settings'
6. Select the profile of your preference to 'edit' or 'activate'

View & Edit Common Settings
To view and configure common settings, do the following:

1. Tap the Messages menu.
2. Tap 'Message Settings' in the menu.
3. Select 'Text message'
4. Select 'SIM message settings'
5. Select 'Common settings'
6. Turn on or turn off each of the following settings by tapping them and then tapping the
     On/Off button at the bottom of the screen:
      Delivery path report
      Reply path
      Save sent messages
6. Tap the Done button when you are finished.

View Memory Status

To view how much memory you have used on the phone and on your SIM card, do
the following:
1. Tap the Messages menu.
2. Tap 'Message Settings' in the menu.
3. Select 'Text message'
4. Select 'SIM message settings'
5. Select 'Memory status'
6. The screen will refresh and display the percent of your SIM card memory and phone memory that is currently being used.
7. Click the Back button to exit the screen.

Select a Preferred Storage Location

To designate a preference of where to store your SMS data, do the following:
1. Tap the 'Messages' menu.
2. Tap 'Message Settings' in the menu.
3. Select 'Text message'
4. Select 'SIM message settings'
5. In the menu that appears, tap the 'Preferred storage' option.
6. Tap either the Phone or SIM to designate where SMS data should be stored. The default of the watch is set to 'Phone'.

7. Click the OK button to save your choice.

Select a Preferred Connection Type

To designate a preference of what type of connection to establish, do the following:
1. Tap the Messages menu.
2. Tap 'Message Settings' in the menu.
3. Select 'Text message'
4. Select 'SIM message settings'
5. In the menu that appears, tap the 'Preferred connection' option.
6. Tap one of the following radio button options:
   Prefer GPRS
   Prefer GSM
   GSM Only
6. Click the OK button to save your choice.

Manage MMS

All of the features listed in this section are available through the messages menu on the Smartwatch. To access the messages menu, do the following:

1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left in the top slide
   Tap the Messages menu that appears.

MMS Definition

Multimedia Messaging Service (MMS) refers to messages that contain multimedia components such as pictures, audio files, video files, and attachments. They are different from SMS (Short Message Service) messages in that SMS messages support text-only and are limited to 160 characters, without attachments.

Write and Send an MMS Message
To write and send an MMS message containing one or more slides, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left in the top slide

8. Tap 'Ring type' to designate whether you want a single ring, repeated ringing, or ascending ringing (growing louder).
9. Tap 'Ringtone volume' to designate the volume of the ringtone and of the keys when the keypad is tapped.
10. (Optional) Tap Extra tone if you want to designate additional instances where tones will be played, such as when the Smartwatch sends a warning or error, when camp on<?> is enabled, or when connecting.
11. When you have finished tap 'back'
12. If you want the profile you just customized to be the active one, tap 'options'and 'activate'.

Network Settings

Network Selection

To configure the Network Selection option, do the following:
1. Tap the Settings menu.

2.   Tap the Network settings option.
3.   Tap the SIM network settings option
4.   Tap 'New Search' to search for a different network
5.   Tap 'Select network' to select a network from the list
6.   Tap 'Selection mode' to set the selection mode as automatic or manual.
7.   Tap 'back' to save your changes.

Preferences

To configure the Preferences option, do the following:
1.   Tap the Settings menu.
2.   Tap the Net settings option.
3.   Tap the SIM network settings option
4.   Tap the Preferences option.
5.   On the screen that appears, tap the name of the network that you want to set as the preferred network in the system.
6.   Tap 'Back' to exit the screen.
7.   Tap 'Back' again to save your changes

Security Settings

1.   Tap the Settings menu.
2.   Tap the Security settings option.

The following Security Settings are used to lock down different aspects of your Smartwatch:

- SIM security – To install a PIN lock and to change the PIN on your SIM card
- Phone Security
- Phone lock – To lock/unlock the phone, enter the default password 1122 or create your own password using the Change Password function in the list.
- Change Password—Use this option to change the SIM Lock password or the phone password for your Smartwatch.

Reset Factory Settings

To reset your Smartwatch so that all of your settings are replaced by the default settings that were in place when the Smartwatch was new, do the following:
1.   Tap the Settings menu.
2.   Tap the Restore factory settings option.
3.   Type the Smartwatch password '1122'

Note: This is a security feature that prevents unauthorized users from erasing all of your settings without your permission.

4.   Tap 'Yes' to confirm that you want to reset the Smartwatch to its factory settings

Manage Bluetooth

All of the features listed in this section are available through the Bluetooth menu on the Smartwatch. To access the Bluetooth menu, do the following:

1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide right in the top slide and tap 'Settings'
3. Select 'connectivity' in the menu that appears
4. Select 'Bluetooth'

Turn On/Off Power
To activate/deactivate the Bluetooth feature, do the following
1. Go to the Bluetooth menu
2. Tap the Power button in the menu
3. Select 'On' of 'Off' to activate/deactivate

TIP: For turning on/off Bluetooth quick: Slide down the main menu to get to toggle
functions. Tap the top button to activate/deactivate Bluetooth.

Turn On/Off Smartwatch Visibility to Bluetooth Devices
To make the Smartwatch visible to Bluetooth devices, do the following
1. Go to the Bluetooth menu
2. Tap the Visibility button in the menu

Search
To search for a Bluetooth device in the vicinity of the Smartwatch, do the following
1. Go to the Bluetooth menu
2. Tap 'Search audio device'

Assign a Name to Your Bluetooth Device
To associate a name with the Bluetooth device, do the following
1. Go to the Bluetooth menu
2. Tap the My name option in the menu
3. Enter the name you want to use to identify the Bluetooth.
4. Tap the Options button.
5. Select the Done option in the menu that appears.

Advanced
The Smartwatch also provides four advanced Bluetooth features, all of which can be

accessed by doing the following:
1. Go to the Bluetooth menu
2. Select the Advanced option in the menu

Advanced Option 1: Audio path

The Audio path option allows you to designate where you want audio path information stored. The two options are:
- Leave in phone
- Forward to Bluetooth headset

Advanced Option 2: Storage

The Storage option allows you to designate where you want Bluetooth data to be
stored. The three options are:

- Phone
- Memory card

Advanced Option 4: My address

The 'My address' option displays the Smartwatch's network address, which is used by
your Bluetooth device when pairing up.

Manage Multimedia

Your Smartwatch comes with an audio player, video player, FM radio, sound recorder, and image viewer, all of which are available through the Multimedia menu on the Smartwatch. To access the Multimedia menu, do the following:
1. Push the power button on the left side of the Smartwatch
2. The middle slide in the main menu is for Multimedia

Audio Player
1. Push the power button on the left side of the Smartwatch

2. In the main menu, slide left in the middle slide and tap 'Music' The Smartwatch audio player allows you to play MP3s and MP4s that are stored directly on your Smartwatch or on a Micro SD (memory) card that you have inserted into the Smartwatch.

Create and Configure the Audio Player List

To add files to the list, do the following:
1. Connect the Smartwatch to the computer through USB
2. Tap 'OK'
3. On your computer open the Smartwatch folder to view the files.
4. You will see three folders
   My Music
   Photos
   Videos
5. Select 'My music'
6. Add the .mp3 or .mp4 files that you want to add to your playlist in this folder.
7. Disconnect the Smartwatch and the computer
8. The music is now added to your audio playlist and will appear when you open the audio player in the multimedia menu.

Play an Audio File

To play an audio file, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left in the middle slide and tap 'Music'
3. Slide the audio player up to get to the playlist
4. Tap the name of the audio file that you want to listen to.
5. In the list that appears, tap 'Play'.

The file will begin to play. When the song is finished, the Audio Player will automatically play the next file in the list or a random file if shuffle mode is turned on.

View Details of an Audio File

To view the details of an audio file, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left in the middle slide and tap 'Music'
3. Slide the audio player up to get to the playlist
4. Tap the name of the audio file whose details you to view.
5. In the list that appears, tap 'Details'.
6. The screen that appears lists the following information about the file:
   • Size
   • Time (length of the song)
   • Title
   • Artist
   • Genre
   • Year

Configure Bluetooth Settings for Audio Files

To configure the way your Bluetooth device handles audio files, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left in the middle slide and tap 'Music'
3. Slide the audio player up to get to the playlist
4. Tap the Options button.
5. Tap the Settings option in the list.
6. Tap the Bluetooth settings option.
7. In the BT stereo output field, select either 'Off' or 'On'.

TIP: For the best sound quality, if possible always select BT stereo output 'On'.

Photos

Image Viewer
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left 2x in the middle slide and tap 'Photos'

The Smartwatch image viewer allows you to view and manage the photos you save
on your phone or SD card

View an Image
To view an image, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left 2x in the middle slide and tap 'Photos'
3. Tap the image you want to view.
4. Tap View to see the image.
5.

View Image Information
To view information for any image, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left 2x in the middle slide and tap 'Photos'
3. Tap the image whose information you want to view.
4. Select 'image information' to view extensive details about the image.
5.

Change Image Display Style
To change the way images are displayed in the Image Viewer, do the following:
1. Push the power button on the left side of the Smartwatch
2. In the main menu, slide left 2x in the middle slide and tap 'Photos'
3. Tap the Options button.

4.   Tap the Browse style option.
5.   Select from one of the following options: 'List style' or 'Matrix style'.

Send an Image
To send an image, do the following:
1.   Push the power button on the left side of the Smartwatch
2.   In the main menu, slide left 2x in the middle slide and tap 'Photos'
3.   Tap the image you want to send.
4.   Tap 'options'
5.   Select 'Send'
6.   Follow the prompts to create the multimedia or Bluetooth message.

Use Image
To use one of your images as a default image within the Smartwatch, do the following:
1.   Push the power button on the left side of the Smartwatch
2.   In the main menu, slide left 2x in the middle slide and tap 'Photos'
3.   Tap the image you want to use.
4.   Tap 'options'
5.   Select 'use as'
6.   Select from the following list of uses for the image:
     •   Wallpaper
     •   Screen saver
7.   Tap 'OK' to save your selection.

Rename an Image
To rename an image, do the following:
1.   Push the power button on the left side of the Smartwatch
2.   In the main menu, slide left 2x in the middle slide and tap 'Photos'
3.   Tap the image you want to rename.
4.   Tap 'options'
5.   Select 'rename'
6.   When you are finished, tap the Options button.
7.   Tap 'Done' to save the new name.

Delete an Image
To delete a single image, do the following:
1.   Push the power button on the left side of the Smartwatch
2.   In the main menu, slide left 2x in the middle slide and tap 'Photos'
3.   Tap the image you want to delete.
4.   Tap 'options'
5.   Select 'delete'
6.   Tap 'Yes' to confirm that you want to delete the image.

Delete All Images
To delete all images stored on your phone or on your MicroSD card, do the following:
1.   Push the power button on the left side of the Smartwatch
2.   In the main menu, slide left 2x in the middle slide and tap 'Photos'

3. Tap 'options'
4. Select 'delete all images'
5. Tap 'Yes' to confirm that you want to delete all of the images.

CONNECTING WITH COMPUTER

SYSTEM REQUIREMENTS

Your computer system must meet the following requirements:
- Microsoft Windows® XP/Vista™/7
- USB port supported

COPY FILES FROM COMPUTER

Files can transfer directly into the watch phone by using the USB cable.
1. Make sure the computer is started and entered into the Windows.
2. Connect the watch phone with the USB cable to the available USB port of the computer.
3. Select ˇMass storageˇ and press ˇokˇ to confirm.
4. The computer would detect the watch phone as ˇNew hardwareˇ and install the driver automatically. A new ˇRemovable Diskˇ will be appearing in ˇMy Computerˇ after installation finished.
5. Drag and drop the files in the computer to the ˇRemovable Diskˇ.
6. To disconnect the watch phone from computer, double click the Safely Remove Hardware icon on the task bar. Click the USB Mass Storage Device, and then click OK. Then you can unplug the USB cable from the computer safely.

Note: Please do not disconnect the device during loading. It may cause malfunction of the device and files.

CHARGING THE BATTERY

- Connect the PC USB port and the watch phone USB port.
- When charge, the power sign is shown dynamic. After 3 hours, the power sign will stop moving, and the charge has been completed.
- To stop recharging, disconnect MP3 from PC USB port.

Notes:

- Battery is charging automatically when the device is connecting to a computer which is turn on.
- In order to charge the battery, please make sure the device is in ˇONˇ state. Otherwise the device could not be charging properly.

IMPORTANT:

- Recommended temperature for battery charging is 0°C to 35°C.
- Fully charge before first time use, or it has not been use for a long period.
- Do not over charge or discharge the player. Over charging or discharging will shorten the battery life.
- The battery could be over discharge if the device is not using for a long time (over three months). To avoid over discharge, fully charge the player every three months.
- Do not disassemble, crush, short-circuit or incinerate your battery as it may cause fire, injury, burns, or other hazards.

Safety Precautions

Please read the safety precautions carefully to ensure the correct use of your watch phone.

Do not crash, throw, or puncture your watch phone. Avoid the falling, squeezing, and bending of your watch phone.

Do not use your watch phone in a moist environment, such as the bathroom. Prevent your watch phone from being soaked or washed in liquid.

Do not switch on your watch phone when it is prohibited to use or when the phone may cause interference or danger.

For driving safety, only a passenger should operate the device when the car is in motion and not the driver. Laws governing the use of electronic devices by the driver may be applicable in your country and/or jurisdiction.

Follow any rules or regulations in hospitals and health care facilities. Switch off your watch phone near medical apparatus.

Switch off your watch phone in aircraft. The phone may cause interference to control equipment of the aircraft.

Switch off your watch phone near high-precision electronic devices. The phone may affect the performance of these devices.

Do not attempt to disassemble your watch phone or its accessories. Only qualified personnel are allowed to service or repair the phone.

Do not place your watch phone or its accessories in containers with a strong electromagnetic field.

Do not place magnetic storage media near your watch phone. Radiation from the phone may erase the information stored on them.

Keep the product away from direct sunlight. Do not put your watch phone in a high-temperature place or use it in a place with flammable gas such as a gas station.

Keep your watch phone and its accessories away from children. Do not allow children to use your watch phone without guidance.

Use only approved batteries and chargers to avoid the risk of explosion.

Observe any laws or regulations on the use of wireless devices. Respect others' privacy and legal rights when using your wireless device.

Strictly follow the relevant instructions of this manual while using the USB cable. Otherwise your watch phone or PC may be damaged.

This manual is for reference only, please refer to the material object as standard.

Use a dry soft cloth to clean the product; do not use water, alcohols, detergent or any chemicals

Please backup any important data, repair or other causes may result in data loss.

Do not disconnect the product during memory formatting or file transfer operations. Otherwise, it may cause program failure or files damage

Power supply & Charging

Only use the accessories supplied with the appliance. The use of incompatible accessories may have serious consequences and permanently damage your phone.

The apparatus should be used in a moderate climate.

The phone is built with an internal rechargeable battery: do not expose the product to excessive heat such as sunshine, fire or the like.

The battery must be removed from the appliance before it is scrapped.

The appliance must be disconnected from the supply mains when removing the battery.

The battery is to be disposed of safely.

Battery contains materials which are hazardous and harmful for the environment.

When disposed the battery, do not short circuit the + and – terminals of battery

Please return the used battery to a suitable collection facility for environmentally friendly disposal.

Do not plug or unplug USB port with wet hands – risk of electric shock.

Medical device

Implanted medical device such as pacemaker may be affected by the product.

Avoid potential interference emitted from the product to the implanted medical device, keeping the product at least 20 cm away from the medical device.

Do not carry the product in the breast pocket.

Turn off the product immediately if you suspect any interference.

Hearing protection

This phone respects the current regulations for limiting the maximum output volume. Prolonged earphone listening at high volume could lead to hearing damage!

Stop using the product or lower the volume if you feel your ears ringing.

Do not turn up the volume too high, doctors warn against prolonged exposure to high volume.

Excessive sound pressure from earphones and headphones can cause hearing loss.

To prevent possible hearing damage, do not listen at high volume levels for long periods.

Copyright

This product is for private use only. Copying CDs or downloading music, video or picture files for sale or other business purposes may be a violation of copyright law. Copyrighted materials, works of art and/or presentations may require authorization to be fully or partially copied or recorded. Please be aware of all such applicable laws concerning the recording and use of such contents for your country and jurisdiction.

Maintainence

Take care of the screen. The screen is covered with a glass layer that may be scratched or broken.

To clean fingerprints or dust from the screen, it is recommended to use a soft, non-abrasive cloth such as a camera lens cloth to clean the screen.

Declaration of Conformity
